

AMAL BABU

| Cell: +1 2898877085 | Email: amalbabunirappel@gmail.com|

PROFESSIONAL SUMMARY

Over 4 years of experience in IT infrastructure, application support, data analysis, and ETL development across Linux and Windows environments. Experienced in working with big data platforms such as Hadoop, Hive, Spark, SQL Server, and Informatica for monitoring, transforming, validating, and analyzing business data. Skilled in developing ETL jobs, SQL jobs, and Power BI dashboards to support business operations, customer retention analysis, KPI tracking, and reporting requirements. Hands-on experience in collecting and transforming data from multiple sources including SQL databases, Excel files, NoSQL databases, APIs, and enterprise applications. Strong experience in modifying workflows and reports based on changing business requirements and improving system performance and data accuracy.

SKILLS & ABILITIES

- Power BI Dashboard Development – DAX, KPIs & Measures
- SQL Query Writing, Data Analysis & Data Transformation
- ETL Pipeline Development and Monitoring
- Informatica Cloud, Apache Spark, Apache Kafka
- SQL Server Management Studio (SSMS)
- Oracle 19c, MySQL, PostgreSQL, Hive
- Data Analysis using Power BI, SQL Developer, Spark & R Studio
- Data Collection from Excel, SQL, APIs, NoSQL & Enterprise Systems
- Data Validation, Troubleshooting & Reporting
- Linux & Windows Server Administration
- SDLC – Agile Methodology (Scrum)
- API Development – Django & Spring Boot
- React, Node JS, HTML, CSS & JavaScript
- Dataverse, SharePoint Online & Excel Online
- SAP, Office 365 & D365 Integrations
- Git Integration & On-Premises Data Gateway Support

PROFESSIONAL EXPERIENCE

CLOUD SUPPORT ASSOCIATE

- Managed production support for SAP-based inventory and WMS applications across franchise networks.
- Administered Linux and Windows servers including patching, performance tuning, backup validation, and service monitoring.
- Created and monitored SQL Server jobs in SSMS to collect, transform, and process operational meter and business data.

- Developed Power BI dashboards to analyze customer retention, SLA metrics, infrastructure utilization, incident trends, and operational performance.
- Used data from Excel, SQL Server, APIs, and enterprise systems to identify customer-facing issues, analyze occurrence frequency and priority levels, and support issue resolution within Linux and Windows-based applications to reduce recurring operational problems.
- Utilized NoSQL technologies including Hive and MongoDB to analyze retail product handling patterns, identify areas causing operational losses and damages, and support business improvement initiatives.
- Troubleshoot POS environments including self-checkout kiosks, Zebra RF scanners, and printers to ensure uninterrupted retail operations.
- Supported data validation, troubleshooting, and reporting activities to improve operational performance and data accuracy.
- Coordinated with application owners and business teams for issue resolution and reporting enhancements.

SENIOR SYSTEMS ENGINEER /PROGRAMMER

| Cognizant Technology Solutions, India | Jun 2019-Dec 2022

- Developed, monitored, and modified ETL workflows based on business and reporting requirements.
- Designed and maintained Informatica ETL pipelines to process structured and unstructured data from SQL, NoSQL, flat files, and enterprise systems.
- Used tools like Power BI and SQL Developer to analyze job health, customer satisfaction rates, complaints versus compliments, customer expectations, and operational trends to support reporting and business decision-making.
- Created Power BI dashboards with well-defined KPIs using data from Excel, SQL databases, Hive, APIs, and NoSQL sources.
- Tuned and enhanced reports for better performance, usability, and business visibility.
- Tested and validated Power BI data sources to ensure reporting accuracy and data integrity.
- Monitored Hadoop and Hive logs, identified data and pipeline issues, and implemented fixes for reliable processing.
- Developed REST APIs and internal applications using Python Django and Java Spring Boot.
- Managed Linux and Windows servers hosting enterprise applications and performed patching, monitoring, and recovery activities.
- Worked with Jira, ServiceNow, and Remedy for incident management, SLA tracking, and change management processes.
- Participated in data analysis, reporting activities, and business discussions to support project goals and operational improvements. enhancements.

EDUCATION

GRADUATE CERTIFICATE | Major: Big Data Solution

Architecture |

2025

- Conestoga College, Ontario, Canada

GRADUATE CERTIFICATE | Major: Reporting Systems & Database Development|

2024

- Conestoga College, Ontario, Canada

BACHELOR OF COMPUTER APPLICATION | Major: Computer Application |

2019

- Mahatma Gandhi University, Kottayam, India
